Illie present critical state of European affairs will render these publications unusually interesting the ring the year 1854. They will occupy a middle cround between the hastily written news items, crude speculations, and the flying runous of the baily Journals and the ponderous Fome of the future instorian, written after the living interest and excitement of the great political events of the time shall have passed away. It is to these Periodicals that readers must look for the only really intelligible and reflable history of current events, and as such, in addition to their well established literary, scientific, and theological character, we arge them upon the consideration of the reading public.

Arrangements are in progress for the receipt of early sheets from the British publishers, by which we shall be about as soon as they can be formished with the foreign copies.
